

Levelized Budget Billing

Consumers must be on our lines for a minimum of 12 months before being eligible for budget billing. The "Levelized" Budget Billing Program looks at a current 12 month average EVERY month. If your usage fluctuates up or down, the budget amount will adjust accordingly.

Should you miss two payments in a row, the budget billing status will be automatically removed and you will be required to pay the full amount each month.

Your levelized amount will start at: \$ _____

I, _____, understand the procedure of levelized budget billing and do agree to comply with the policies governing collections, and disconnection for non-payment. I also understand this type of billing is a privilege offered by the cooperative for my benefit, and if I fail in my monthly payments, I can be denied any future use of this type of billing.

Your account must be at a zero balance before the budget billing can be started.
